

Paper Shredding Machine JBF DC 50/43

The JBF DC 50/43 is a flexible paper shredder. With its various possibilities of infeeding devices and material exits we complete our range of heavy duty shredders type DC.

The JBF DC 50/43 is layed out to shred single paper sheets as well as continuous paper lists and books.

Included staples and paper clips are no problems for the special designed and hardened cutting shafts.

Another field of application is the shredding of CDs and diskettes.

ADVANTAGES:

Simple operation:

- Operation elements of the electronic control are clearly arranged on the front of the machine.
- Electronic overload protection with reversing circuit and automatic machine restart.
- Technology of reversing circuit with automatic restart assures a maximum high capacity of the machine.

Highest safety for the operator

- Special design of the machine's infeeding area. Emergency stop next to operator.

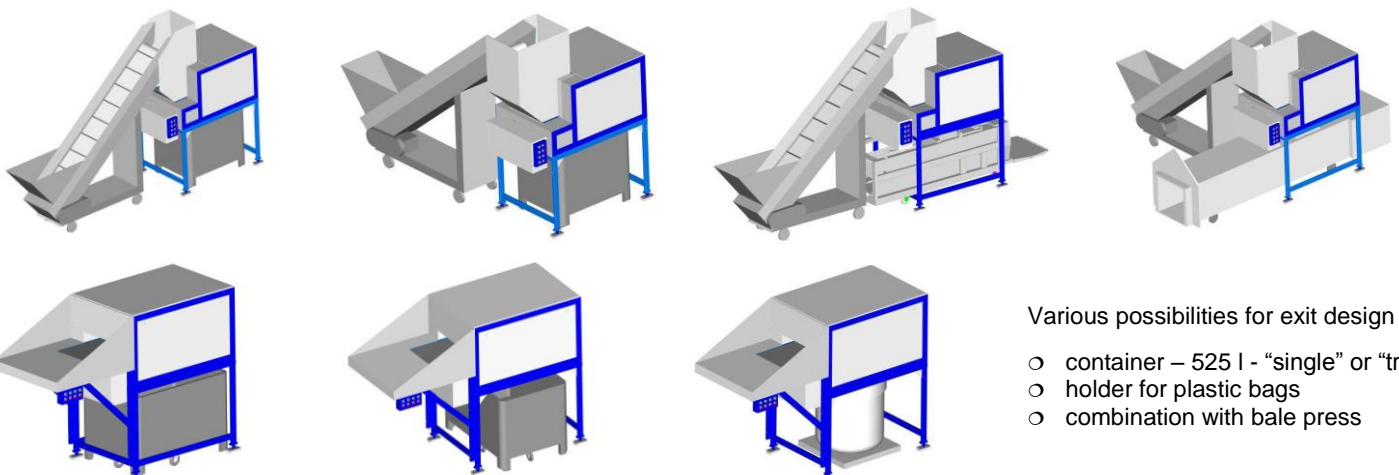

TECHNOLOGY:

- Special machine design with divided frame plates, allows to lift the complete knife shafts out of the machine for a quick exchange.
- Low noise design by slow running cutting shafts mounted in a sturdy, bolted machine frame.

Technical data JBF DC 50/43 for a defined shredding of the data protected material according to DIN 32 757-1:

particle size	6 mm or 11,8 mm (alternatively stripes or cross-cut)	machine measurements (length x width x height) of machine equipped with infeed-table
working width	500 mm	length, without exit conveyor
cutting speed	0,31m/sec.	width, with infeeding table
container volume	525 l	width, with infeeding hopper
connected load	400 V	height
drive power	9,2 kW (optional 11 kW)	machine weight
		2234 mm
		895 mm
		890 mm
		1665 mm
		850 kg

Layout samples:

Various possibilities for exit design

- container – 525 l - "single" or "train"
- holder for plastic bags
- combination with bale press
